DO YOU DO FULL-ARCH?
DO YOU USE PHOTOGRAMMETRY?

Great Impressions

IMETRIC

Optimize your workflow by utilizing photogrammetry with Great Impressions Dental Lab.

Workflows

Stackable

Our Stackable Guide supports All-on-X procedures by guiding bone reduction, implant placement, and temporary prototype prosthesis. We offer a full package: conversion assistance, tooth model, bone model, reduced bone model, pin guide, fixation base, bone reduction guide, carrier guide, and 3D printed prototype prosthesis.

Free-Hand

Our Freehand service offers a traditional All-on-X approach without a surgical guide, while still delivering a full-service package. This includes 3D models, next day 3D printed prototype prosthesis, and a reviewed treatment plan. A hybrid zirconia prosthesis is standard, with other options available.

Lab Requirements / Services

Our team is here to assist in any way we can. Below are our case requirements and services we offer to deliver successful restorations!
